CR200

The CR200 is the latest model to be introduced to Isotherm's new exclusive Cruise INOX stainless steel range. Designed for easy installation under the work-surface, the CR200 is a stylish new fridge-freezer that has been developed to offer spacious onboard storage for fresh and frozen consumables aimed at the 40-50ft power and yacht market.

Fitted with a flush mounted stainless steel door with an integrated door latch to the front of the unit, the CR200 is divided in to a 150-litre volume fridge section and a 50-litre volume freezer section. The interior has also been finished with stainless steel trims for an extra luxurious finish.

DR65

New from the INOX stainless steel drawer range are two space-saving, front-opened, drawer refrigerators. The DR65, with a 65-litre volume is a new design based on the standard 65-litre refrigerator with a pull-out drawer featuring an innovative interior design with bins and bottle racks. The INOX stainless steel drawer refrigerators are also available with a 36, 105 and 190 litre capacity.

DR190

The top of the range DR190 is a 190-litre volume luxury double drawer refrigerator designed exclusively for the luxury power and yacht market. Take a look at the internal design with the latest ideas for food and drink storage. This in a unique product at a level beyond other marine refrigerators.

Special Designs

The BI55 is a special designed fridge-freezer originally designed, for leading yacht manufacturer, Hallberg Rassy. Based on Isotherm's popular Build In integrated fridge-freezers, the BI55 has been modified to suit Hallberg Rassy's specific customer requirements. It is a perfect demonstration of how Isotherm works with its OEM partners. By bringing together its expertise, flexibility and innovative design, they are able to supply anything from single custom designed units finished in stainless steel to large scale mass produced units.

Custom design exclusive for Hanse Yacht

4900 Magnum

This is our biggest cooling unit ever based on the new Danfoss BD80F compressor. Using a XXL holding plate and our patented ASU technique it cool boxes up to 400 litres (14 Cu Ft).
